

## **AMERICANS WITH DISABILITIES ACT**

### **REGULATIONS ON PUBLIC ACCESS**

#### **Westmoreland Conservancy Public Use Policy Morosini Nature Reserve**

The parking area at each Westmoreland Conservancy reserve is to be accessible to mobility disability devices. The parking lot at the end of Morosini Farm Court is designed specifically to allow up to five (5) accessible busses or multiple vehicles to park in a clockwise manner and unload/load with lift-platforms to the center of the lot. This lot is adjacent to the Universal Pedestrian Trail, which is a rolled surface trail designed to allow those with mobility aids to experience nature.

The remaining trails at the Morosini Nature Reserve are designed to have minimal impact on the surrounding environment and are natural surface, which may include tree roots, narrow passages and steep slopes. To alter the trail would significantly alter the protection/preservation of the landscape, and therefore no vehicle powered by battery or other engine is permitted access. Manually operated mobility devices are permitted at the user's risk.
